Me, Wiz, is making a mod with RamJet57.
We are making a space mod with space fighters and other sorts of stuff.
We badly need people to help us out with the mod.
We need:

don't use freewebs, downloads with 10kbps maximum

try out lycos tripod europe (<http://www.tripod.lycos.co.uk> = english)

50 mb space
adds but you can get rid of both
fast servers, i downloaded with 350 kbps once
allows you php
unlimited bandwidth

WHY DO I EVEN CONTINUE JUST CHECK IT OUT
