I was browsing the net looking for some quality fan sites to give news about the big developments in Renegade...

Never did I imagine I would come across the stoneage ...

By stoneage I mean non-educated in the ways of current Renegade development...

Am I making no sense well maybe this will clear it up:

Forum Post:

Jackass says (curiously):

Has anybody here heard of the so called Renegade Evolutions...

Have you heard of n00bstories...

Have you heard of teamspeak regulator...

Have you heard of BR.net...

Have you heard of ACK, Crimson, Blazer or Agent Gibson...

-Jackass

The one and only reply:

Saitek2 says:

And the point of this topic is to find out what we kno??

Well my best guess is that BR.net is a web site and the rest are either clans/guilds/whatever or people

Shocked Jackass replies:

Yes the purpose was to find out what you know...

I out down the biggest things to happen to Renegade ever there...

Yet you didn't know what they mean't Br.net is not a website...

Here is a breif explanation of what they are:

n00bstories is a place to report all the n00bs that you may encounter in games it is also home to

the main Public Forums, the n00bstories forums & the Sniper forums aswell as being the home of most of Renegades community...

Teamspeak regulator is a new addon to Teamspeak in development that will allow users to voice chat in-game with the help of BR.net...

BR.net is the program that works with the FDS to allow extar moderators to watch over games in-game and via a IRC chat room aswell as automtically kicking in several situations...

ACK is probably the best map maker so far and has produced countless amazing new maps...

Well Crimson she is one of the main people responsible for n00bstories and is very experinedced with php and runs a good site with the help of here man Blazer...

Blazer is with Crimson in the sites and is also the main person behind adapting the Teamspeak Regulator and is a lot to do with the BR.net application...

Agent Gibson is the main man behind the modeling of the Ren Alert Renegade modification and is extrmely skilled...

I could go on and on...

If you would like more info just ask and I will tell.

-Jackass

How did that guy get 544 post not even knowing that & then nobody else replied over a period of a week or so the topic dies ...

This is no April Fools joke see it for yourself:

<http://cncrenegade.com/phpbb/viewtopic.php?topic=1938&forum=8&2>

I quote Dante as he said earlier "sad people in the cnc community aren't familiar with alot of the Renegade items and perks"

These guys need or help before the mutatae into n00bs *gulps*.

Why don't a bunch of us go over there and drag them over here to strenghten the community...

Send all th n00bs to that site then (or r they all alreadt there)...

Auto kick thingy is called BR.Net:

<http://www.renevo.com>

For more info.

BlazeRegulator Beta Release

BlazeRegulator Point Release 01

I got both and they both have an error the second one is the error I said earlier the 1st has a different error any suggestions is there a program i have to run first before it works???

so what? I know what those all are...but only one or two of them do I really care. Alot of people actually are happy with just playing the game...it's nothing to make fun of someone about

Duke of Nukesso what? I know what those all are...but only one or two of them do I really care. Alot of people actually are happy with just playing the game...it's nothing to make fun of someone about

Hmmmmm never thought of it that way...

These utilites usally make the game more fun and enjoyable...

But true they must just be happy with playing the game.

spreegemWHAT IS FDS

FDS is the free dedicated server that you need to run a dedicated server...

Did you read the help file?

Get it from:

ftp://ftp.westwood.com/pub/renegade/dedicatedserver/RenegadeFDS_1037.exe

Thats a caps sensitive url ok.
