I have made all the settings and stuff, but still renbot will not open up for me .. maybe i have done something wrong in the settings, im not sure .. but here it is ...

```
#--Start Configuration-IRC------------------------------------------------------------
# Edit the information below for your setup.
# At least edit BotName and IrcChannel.
BotName = fcusnipebot
BotFullName = BlazeRegulator/BRenBot 1.30 Win32
IrcServer = irc.zirc.org
IrcPort = 6667
IrcChannel = #FCUSNIPESERV
#---Q/NickServ-------------------------------------------------------------------------
# Enable auth via "Q" or "Nickserv" below. Sample input is shown.
Qauth = 0
Qusername = fcusnipebot
Qpassword = *****
# Note for Nickserv auth you give the name of nickserv and the full ident string as example
Nickservauth = 1
Nickservname = FCUSNIPESERV
Nickservauth = identify fcusnipebot *****
#--Windows or Linux--------------------------------------------------------------------
# BotMode MUST be "WIN32" for windows servers, or "LFDS" for Linux servers.
BotMode = WIN32
#--Remote Admin Settings---------------------------------------------------------------
# The next 3 lines should be the same info that is in your server.ini
# Note: Although it says "Linux" its the same for Win32
RenRemLinuxHost = 127.0.0.1
RenRemLinuxPort = 5555
RenRemLinuxPassword = ********
#--FDS Installation--------------------------------------------------------------------
# Verify these paths are correct with your Renegade installation.
# Note: FDSLogFilePath must end with the trailing slash (as example below)!!
# Note: Linux users use forward slashes (/) in your paths.
FDSConfigFile = C:\Westwood\RenegadeFDS\Server\Data\svrcfg_cnc.ini
FDSLogFilePath = C:\Westwood\RenegadeFDS2\Server\
#--Miscellaneous Settings--------------------------------------------------------------
# Every x minutes the bot will announce a random line from AutoAnnounceFile.
AutoAnnounceInterval = 600
# LadderLookup currently not working. Do not turn it on or it will hang the bot.
EnableLadderLookup = 0
# Set this to 0 or anything but 1 to disable voting.
VotingEnabled = 1
# How long people get to place votes.  Default here is 60 seconds.
```

VotingPeriod = 60

----

then in my server ini i have done this settings, and of course the serial, nickname and pw i have in there also ...

LoginServer = [FCU] SNIPESERVER
;
; This field can be used to specify the Westwood Online matchmaking server
; to connect to. If left blank, the Renegade Server will connect to the
; closest matchmaking server. To specify a server to connect to, use one of
; the names listed above in the section 'Available Westwood Servers'.

LoginServer = [FCU] SNIPESERVER

RemoteAdminPassword = ********
;
; This is the password required to connect to a server with the RenRem
; admin too.
; Slave servers inherit this setting from the master.

RemoteAdminPassword = ********

RemoteAdminPort = 5555
;
; The port to connect to for remote administration.
; This can be set per slave. The default slave ports will be shown when
; connecting to the master with the RenRem tool.

RemoteAdminPort = 5555

----

the RemoteAdminPort was set on this one ----> 5555 when i got the server, but what i wonder is, shall i have the irc port or ???

nickservauth=1
nickservname=nickserv
nickservauth=identify *****

in server.ini
logonserver=european server(or pacific or usa server)
allowremoteadmin=true
port&pass leave it
grtz

Well, your first problem is you should have your server on irc.n00bstories.com

Just kiddin'

Somewhere in the dark space of my brain, I remember that Qpassword must be exactly 8 characters. It seems there are only 5 *. But maybe I m wrong. Please try.

hmm, I cant see anything unusual, but maybe this:

FDSConfigFile = C:\Westwood\RenegadeFDS\Server\Data\svrcfg_cnc.ini
FDSLogFilePath = C:\Westwood\RenegadeFDS2\Server\

do you have 2 fds? RenegadeFDS and RenegadeFDS2?

View Forum Message <> Reply to Message

I dont think so, but who knows. Please remove the "2" just to try and try the servers separately.

It looks like you are using the config for one server, and the logfile for the second server....

just like RadioactiveKangaroo said, keep doubleclicking, I had the same problem too. You can also go there in your dos prompt en then keep pushing up -> enter etc...
After a while it should start.

good luck;)
