Hi Crimsson!

Long time no see. Just wondering if it would be possible to make a sticky topic containing links to all the new maps and utilities that Blazer, ACK, and others have created?

That way, all new visitors to the forum don't have to search through tons of topics and posts to get the info, nor get flamed as n00bs for asking about them.

This is a good idea...

You can just go to <http://www.renmaps.com/> though because they have all the best ones I believe.
