i know i should be posting this over at servermatrix.com but they dont have a clue what renegade is

would floodguard run correctly with renegade?

its useless don't bother running it. Ya It will stop a ddos attack, by BLOCKING all traffic from the port. End result, server will still go offline. It doesn't just block the "bad traffic".

Tried it, ran it for a month and a half, so even past the training period, it still sucked.
