This is a recent problem. The other day i was unable to sign on to westwood online, after i loged in it would say connecting. After a little while it would say unable to connect to server, unable to connect to westwood online. After a few hours it let me back on, but it has happened again and this time its been little over a day since i was last on wol. Is there something wrong with wol or something with my comp. i use dsl and have no firewall, if someone could help that would be great.

ok u can fix this
step 1 : exit renegade
step 2: open word
step 3 send a nice e-mail to EA about WOL and there support
