It's my first time making a map, and I've used this tutorial :

http://www.cncden.com/ren_map_tutorial.shtml

but I can't get past step 6 or 7.. when I try to step 7 my plane will go under the construction yard,

you can see the coordinates at the bottom right. The coordinates are what you really need right now. Leave them down in that bottom corner

they won't stay there they disappear as soon as I unlick the edge button.. help please?

Copy and paste them into the bottom left text bar, then use the vertex points to line them up.

That tutorial is really old and I should update it sometime.

vertex points? what are those? do you mean dragging the plane with it so it lines up with the construction yard? 'cause that's not working for me. it either gets a bit under the CY or it doesn't line up properly, leaving some space

edit: and where's the river raid map you talk about in the tutorial? I can't find the download you mean anywhere in the tutorial
