Me and Homey cannot connect to westwood. We get "requesting server list..." and it times out. We live in Canada and we live about 1 hour away from each other. A lot of our friends can get on. We restarted our internet modems to get a New ip and same problem. We live in Ontario, Help.

I got the same problem, i have tried reinstalling and everything i can think of. No matter what I do I get 'timed out' while trying to find the servers. I'm in the uk. I can't get real to work at all.

I had trouble getting WOL to connect until I realized my anti-virus software was obstructing my ports. If everyone else thinks it's a safe thing to do, shut off your virus software, restart Renegade and try connecting.

Whenever I get that "Requesting Server Lists..." message that just sits there, all I do is just cancel it and hit Advanced Server Listings again and it usually connects right up. But maybe that's just for me?

dont USE gsa !!!! lol

It might be norton

disable it if you have it.

I *ALWAYS* have that problem. I always have to hit cancel and then click advanced listing again and it ALWAYS works the second time. Weird and annoying, but doesnt stop me from getting on
