But it's been sitting there for about 10 minutes. I've restarted and turned off my firewall and still nothings happening. Is there a probelem with the servers or whats up?

Ok, nevermind.. It works now, but now I have stuff in my folder that won't let me play.. IOI.

Did RenGuard install these files? Or are they part of Renegade, beause I just noticed them.

The only "new" files renguard makes in your renegade directory is game2.exe (Renguard renames game.exe to game2.exe and RG becomes game.exe).
