It only stops cheats if everyone is running RenGuard. Anyone who isn't running it has the ability to cheat. Only way to make sure everyone is running RenGuard???

Join a RenGuard server!

Rengaurd is not stopping cheats, or at least the cheats it does not know about.

15 mins ago somone just sent me a screenshot of them using BH on my server Un CTF. After that I decided to remove engaurd because it is causing more problems than fixes.

RenGuard caused my Renegade to hang everytime i loaded it up. RenGuard also wanted to make an outgoing connection to "RenGuard.<censored>.com" in which Mac said it shouldn't.

lol a screenshot...

First off, prove the server is running RG, then prove that it was running it at the time the screenshot was taken.

InvaderAfter installling Renegade on my computer, Renegade does not work anymore.

So let me get this right... You installed Renegade, then Renegade stopped working? Sounds like a personal problem to me.

Xtrm2MattRenGuard caused my Renegade to hang everytime i loaded it up. RenGuard also wanted to make an outgoing connection to "RenGuard.<censored>.com" in which Mac said it shouldn't.

It should. It accesses the internet to get the master server list, and MOTD, and auto-updates. If your firewall stops it, it cannot connect to RG network, thus the hang.
