Firstly, I'd like to thank the RenGuard team for of their hard work. I'm not here to criticize, but I'm having some problems.

RenGuard installed without a hitch; I received no errors or anything. I proceed to launch RenGuard and then I launch Renegade, and then I try to join the n00bstories RenGuard ONLY server. I don't tamper with anything at all and I don't even alt-tab, but shortly after joining I am notified that I need RenGuard in order to play on the server and I am kicked. This happens every time I try to join, after repeated restarts of Renegade and RenGuard.

I also suffer from a significant FPS decrease when I joined the n00bstories RenGuard only server; I haven't tried regular servers yet, but I will--with RenGuard running.

I'm running XP, Renegade 1.037, 1 gig of RAM, 2.08 ghz AMD Athlon XP 2800+ processor...hmmm what else is relevant? Oh yes I use Norton Personal Firewall 2002.

Should I uninstall and reinstall Renegade again? -_- Or just RenGuard? What should I do?

When you start RenGuard, you should get a message along the lines of:

Connected to server.
Welcome to RenGuard , TryLee!
To launch Renegade, please click 'Renegade'.

Make sure that nick is the same as the nick you use on WOL.

Well that's the only trouble I've had with that... sorry I can't be of more help!

Well, it looks like everythings ok now; what a bumpy ride :-\

and now I'm banned from the RenGuard n00bstories only server. -_-
