Hey.. I haven't played Renegade in quite a while. I have it uninstalled and I am thinking about reinstalling it. I was wondering if people are still cheating lots on it, that's the reason I quit. If there are cheats still available, do lots of people use them. If so, I think I won't re install it. When I say lots of people use them, I mean like 1 in every two servers. Please reply. Thanks!

That's cool. But can't people just not run it and still cheat in a server that some people are using Renguard? Is there a way to tell if a player is using Renguard or not?

the servers that RenGuard only let you play if you have RenGuard. so you can't play on a server with RG without having the client-side version for yourself.

You can also play on non-RenGuard servers with RenGuard, but you having RenGuard doesn't help with preventing cheaters.

ATM there are 508 users online.

There are 40 servers online.

40 Servers with Renguard required? That's not too bad. Maybe I should reinstall it.
