I see a few people complaining about not being able to Exit RG or restarting it but it's the most simplest thing ever. Once opened some people experience a problem about it not being able to load and have to restart RG but they cannot because they can't find it.

Once opened RG click Renegade to play as you all know, if it fails and you have to restart it click Quit. Or if the program is miminized and you still need to restart it, you will find it's icon in the bottom right corner of your screen. Double click > Quit ... Then re-open it....

Don't knwo if this has already been posted but I can't be bothered looking

Oh and Alkaline Haters? :rolleyes: What is it?

I havn't been payin all that much attention to the installation and uninstallation of RenGuard, but I do know quite a bit about the Alkaline Haters.

The Alkaline Haters Association is actually what I like to call, the forum's defense against fucktards. Alkaline just happens to be the main target.
