Okay two bugs:

1). Unauthorized file data\Mod-stylemgr.ini has been found in your renegade directory

I keep a modified stylemgr.ini file in my data folder. It's named Mod-stylemgr.ini because I sometimes like to switch it out with the stylemgr.ini file, and all I have to do to switch them is rename them.

2.) Unauthorized file data\c_ag_gdi_gr.w3d has been found in your renegade directory

Unauthorized file data\C_AL_M_.w3d has been found in your renegade directory

Unauthorized file data\c_al_m_I0.W3D has been found in your renegade directory

Unauthorized file data\c_al_m_I1.W3D has been found in your renegade directory

Unauthorized file data\c_al_m_I2.W3D has been found in your renegade directory

Unauthorized file data\c_al_m_I3.W3D has been found in your renegade directory

I think that these files are for the renalert medic model I downloaded. I'd send them into to Mac, but all I have is a crappy yahoo email account, and I can only send 1 meg files. EDIT: can't find a link to the file

Quote:I keep a modified stylemgr.ini file in my data folder. It's named Mod-stylemgr.ini because I sometimes like to switch it out with the stylemgr.ini file, and all I have to do to switch them is rename them.

Keep it on your desktop.

Unauthorized file data\c_al_m_I2.W3D has been found in your renegade directory

Unauthorized file data\c_al_m_I3.W3D has been found in your renegade directory

Mac isn't going to be able to fix that until he gets the files.

instead of calling mod-stylemgr.ini, call it stylemgr.ini.mod -- then it sorts right next to the other one alphabetically, and RenGuard won't scan it.
