Normally, RG works very good. But sometimes, i can't connect to any RG server, although i have it and its running. If that happens, i restart RG. Doesnt help. I restart my PC. Doesnt help. So i can't play renegade anymore today. That happened to me at Baja-Clanserver and at Jointzsrv. And the strange thing is, one an other server, RG works. After seeing that, i've joined Baja again, but was kicked.
I have no skins or any other things.
What shall i do now ?

I know that jonwil was doing some work on the client today... maybe it caused some odd behavior? I will post more if I confirm.

Its a bug in the Server Side Client. I think if the host restarts RenGuard its fixed but im not sure ;/

I can confirm that phenomenon. Happened to me once some days ago and still is happening to other people who wants to connect to our server (WinNT, SSC, BRenBot 1.31). Restarting the SSC does NOT help. The problem persists.
I reported this bug some days ago. Maybe the master desync is now fixed. However, the problem still occurs.

I hope its fixed soon. But i'm wondering why it takes so long to kick me out, at baja it takes ca. 1.30

minutes.

the same odd thing is happening to me but something very odd is that this morning i played on BAJAserv it said i needed renguard to play etc. etc.

but... i didn't get kicked???

whats happening to rg
