well since everyone is saying they want recon bikes...i was thinking it would be kinda cool to drive one right? well i was looking through some wallpapers and saw a pic of a good bike, but for GDI..so i've decided to make an add on mod for Renegade that gives NOD and GDI 2 different bikes, so now all u GDI people can't say it will inbalance the game =OP..i've already almost completed the GDI bike..and will be redoing the Renegade bike to look more like the Tiberium Sun bike..cuz we all know that one looks alot cooler ^_^...this mod should be done pretty soon..if the tools come out this week..expect it done by this weekend or middle of next week..

Not a bad idea, but also give NOD the SSM and think of something new to give GDI. Let NOD keep it's current bike skin and give GDI a new one.

it looks like a weiner mobile.anyway, it needs to be skinny in the middle, and fat at the ends. Right now it looks like a tube. the shiny glass cockpit is done well though.

[View Forum Message](#) <> [Reply to Message](#)

Yah looks kinda like a shoe atm, but a good start, mostly need to thin the middle (alot) and front, and if your up. to it maybe add those tube thingies to the side. By the way, if you look at the original picture the GDI Bike is Really a Trike and has 2 wheels in the back and 1 in the front.

thankx guys..and Raptor i know...but it seems to me..driving a 3 wheeled vehicle would be pretty ***..like driving a tank...and i thought it would be better to make it a bike..and i'm not going to make it EXACTLY like the pic..but pretty close...so thankx for info guys =O)

[View Forum Message](#) <> [Reply to Message](#)

argh.....ok..*trys to calm down*This is a Renegade Mod...i am making it so both GDI and NOD

have Recon Bikes...i was looking through Proclones wallpapers and saw those bikes...i decided to make the mod from those pictures...if the pics came from Dune it doesn't matter...i am making that the GDI Recon Bike...and the TS Noc Cycle the Recon Bike for Nod.....get it yet?

well i dont know about these other guys but i say that it lookis like its gana be a kick ass bike but having Mguns on the top would kinda make it like a speedy humvee or nod buggy may i suggest rockets or even a laser

thankx ken =O)...now a couple things...#1...see those boxes on the side of the vehicle??? once its skinned u'll see more of what it is..but those are missle pods =O)...and those "tank-like-poles" are going to be rotatable machine guns..NOD will have a machine gun on the nose of the bike, but those will be either be weaker than the rifle of light infantry with unlimited ammo...OR..as strong with about 400-500 clips..once again if ANYONE WHO CAN MODEL good would'nt mind helping me make a NOD Cycle from Tiberian Sun i'd appreciate it =OD

i still say a laser bike whould be really cool maby it could be for the nod bike like a mini portable obelisk of light.it would probbly need to be fixed as to not make it to powerfull. nod semes to have most of the laser stuff with the exception of the ion cannon for gdi. i whould help if i could model but i wouldnt know were to start or were to get the programs.

That's some pretty good modelling there. I think the 'Dune' version of the GDI Recon Bike would be really cool in the game.

just to clear things up since u guys still don't get itNOD Recon BikeThe NOD Recon Bike will be converted into the Tiberian Sun NOD Attack cycle...it will have a nose-mounted-machine gun, with 2 missile pods on the sides, very fast but weak, and about 200-300 creditsGDI Recon BikeThe GDI Recon Bike will be converted into the "Dune" Trike with modifications...it will have a roof-mounted-machine gun, with 2 missile pods on the sides, very fast but weak, and about 200-300 creditsHope this clears up any Q's or what u guys were thinking =O)

heh..well i don't exactly know...when Proclone sent the converted Recon Cycle over when i tried to edit it there was an error..and i haven't got any skins to show up, so i am hoping that PySty will be able to use Milkshape and do it on there...but pretty soon ^_^
