Hello,

When i start renegade (using the icon) its says Renegade not found

I went into my directory and launched Game.Exe ffrom there (didnt work)

Can some one plz explain to me wat i need to do.

!@#%&^*Partiiman*&^%\$#@!

Sounds like you don't have RenGuard installed where Renegade is... or you somehow deleted or overwrote your game2.exe.

Reinstall or obtain a game.exe elsewhere... if your game.exe is about 4-5MB then it's right one... if it's about 117 KB, it's Renguard.
